The exam results are very good this year. Half the class of 32 have obtained marks in excess of 70%, and a quarter have exceeded 80%. The overall average is 63%, due to a small number of failing candidates.

Question 1 was answered by 24 candidates and received an average mark of 13.46/20 (highest mark 20/20, lowest mark 2/20). This was the highest average of all the questions, indicating that the question was more-or-less universally well handled.

Question 2 was answered by 29 candidates, making it the joint most popular question, receiving an average mark of 12.93/20 (highest 18/20, lowest 3/20).

Question 3 was answered by 13 candidates, making it the least popular question, and it also received the lowest average mark of 11.08/20 (highest 16/20, lowest 3/20).

Question 4 was the other popular question, answered by 29 candidates and receiving an average mark of 12.62/20 (highest 18/20, lowest 4/20).

Mostly, marks were lost due to only partially answering the question set, or to answers that were imprecise.
