UG Exam Performance Feedback
Third Year
2016/2017 Semester 1

COMP33511   User Experience   Simon Harper

Comments   COMP33511 ran as a 16 compulsory questions (including 10 MCQs) delivered by Blackboard.

Students who answered badly on two questions normally answered badly on all questions. In general, students performed well on most question apart from Q15 'How do Aesthetics and Visual Complexity relate to each other? ..' Here answers where either incorrect or superficial. However, Q16 "Ars Technica discusses 'Social network structure helps trends emerge from simple interactions'" which should have been the most taxing was very well answered with a high average, so well done!
