UG Exam Performance Feedback
Second Year
2018/2019 Semester 1

Comments
Section A - MCQs
Section B - Gareth Henshall

Q1.a/b/c Overall these were answered well. Some of the symbols used were unclear and hard to read.
Q1.d There was often confusion with the participation ratio from Pizza to Toppings. Some students created Toppings
and Pizzas as Weak attributes when these should just be normal tables in their own right.

Section C - Sandra Sampaio

Section C contained one essay question covering the topic of Normalisation using a simple, but real-life example.
The marks for this question were very good, with the majority of the students scoring above the average. Only the
students who did not attempt to solve the question or gave an incomplete solution did not do so well.
