

UG Exam Performance Feedback

Third Year

2019/2020 Semester 1

COMP33511 User Experience

Simon Harper

Comments The results tell me that Average Exam score was 21.4 (71.33%) STD DEV 14.05% and the Average Exam Time: 1 hours 24 mins with 8 easy and 8 medium questions and for differentiation (Indicates how well a question differentiates between students) 13 good and 3 fair questions. As expected all students did well in the MCQs but then the results were mixed in that some did very well in the harder synthesis and creation questions while some did not do very well at all. the provision of the open rubric might also go some way to explain the increase in scores and I also think that I was more lenient on the creation and synthesis questions than I was expecting.
