

Title	BMAN60091 Application and Evaluation of IS
Credit Rating	15
Level	MSc
Semester	1
Course Coordinator(s)	Professor Mike Newman
Methods of Delivery	Lectures
Lecture Hours	20
Seminar Hours	10
Private Study Hours	120
Total Study Hours	150
Assessment Methods and Relative Weightings	Coursework – 50% Exam – 50%
Aims	
To develop an understanding of the problems of measurement, valuation and evaluation of Information Systems within a variety of organisational settings.	
Learning Outcomes	
<ul style="list-style-type: none"> • Have a familiarity with the specificity and complexity of IS development • Have detailed knowledge of several case studies concerning applications and development of IS • Understand the problems of evaluation and measurement associated with IS development within a variety of organisational contexts • Have a familiarity with the techniques and tools of project management 	
Syllabus	
<p>Part 1 Applications and Development of Information Systems</p> <p>Week 1: Introduction to course unit. Applications of I.S. in organisations Week 2: Process Models of Change. Week 3: International aspects of I.S Applications Week 4: Electronic commerce/ business</p> <p>Week 5: Systems Failure: Resistance to Change and other factors. Process Theories of Change.</p> <p>Week 6: READING WEEK – no classes this week Week 7: Developing Successful Systems</p> <p>Part 2 Evaluation of Information Systems</p> <p>Week 8: Frameworks for understanding systems building in organizations. The valuing of technology via ongoing construction of needs, uses and utilities, Techno-organisational change.</p> <p>Week 9: The specificity and complexity of Information Technology: What makes IS a unique technology? – enrolling differentiated users Week 10: Project Management in the organizational context: What defines an IS project; Measurement targets and tools? Week 11: Course revision and overview</p>
