

PGT Exam Performance Feedback

2016/2017 Semester 2

COMP62542 Pattern-based Software Development

Liping Zhao

- Comments
0. 43 students took the exam.
 1. There are no unanswered questions.
 2. Only one question is answered correctly by all students.
 3. No students have achieved 100% marks.
 4. The highest mark is 21 (out of 25) (84%) and the lowest is 8/25 (40%).
 5. The SD is 2.96, with 16 students achieving marks within 60-69%.

Overall, I can only say that the mark distribution looks good, suggesting a mix of hard and easy questions. The students who did well have clearly understood the taught materials better than the students who did less well. I am satisfied that the right questions have been set and the performance is within my expectation.
