

COMP62342 Exam Performance Feedback

AY18-19

Sean Bechhofer
Uli Sattler

June 28, 2019

Remarks

There were 5 students who sat the exam. The median mark was 45 out of 60, with the mean mark 46. There were 0 students with a mark below 50%. There were 4 students who achieved a mark above 70% in the exam.

Analysis

With small numbers of students, we should be careful of setting too much store on statistical analysis, but Blackboard's item analysis suggests that there were 12 easy questions and 14 medium questions.

Overall, performance on the MCQs and true/false questions was better than in the essay style questions, but general performance across the board was good. There were no questions that raised concerns about the cohort's understanding of the material.
